PROFILE

Motivated and detail-oriented Computer Engineering graduate with foundational knowledge in Java (Core and Advanced), Flutter, and SQL. Familiar with developing backend applications using Spring and Spring Boot. Adept at understanding object-oriented programming principles and basic cross-platform mobile development. Eager to apply skills in real-world projects and continuously learn modern development tools and frameworks.

EDUCATION

Dr. Babasaheb Ambedkar Technological University

Maharashtra, India

Bachelor of Technology in Computer Engineering(7.1 CGPA)

2022 – 2025

- Top 10 performer of my college batch

Maharashtra State Board Of Technical Education

Maharashtra, India

Diploma in Computer Engineering(83.94%)

2019 – 2022

- Top 10 performer of my college batch

SKILLS

Technical: Java, Spring, Spring Boot, Hibernate, SQL, HTML, CSS, Javascript(basic),Thymeleaf, Flutter(Basic),

Tools: Visual Studio Code, Android Studio , Eclipse, Spring Tool Suite

INTERNSHIP

Cyber Success

Pune, India

Intern

02/2025 – Present

- Undergoing hands-on training in Core Java, Advance Java, Spring , and Spring Boot for Backend Development.
- Learning MERN Stack (MongoDB, Express.js, React.js, Node.js) for full-stack JavaScript application development.
- Gaining exposure to RESTful APIs, database integration, and deployment techniques.
- Working on mini-project and assignments to apply skills in real-world scenarios.
- Improving understanding of object-oriented programming, software development lifecycle, and version control using Git.

Domain Computers

Sangli, Maharashtra, India

Intern

8/2021-9/2021

- Completed hands-on training in computer networking and cloud computing.
- Gained practical experience using Cisco packet Tracer to simulate and configure networking environments.
- Learned routing Concepts and performed configuration of networking devices such as routers, switches, and hubs.
- Practiced connecting different types of network topologies and troubleshooting connectivity issues.
- Acquired foundational knowledge of Cloud Computing services in AWS and Microsoft Azure platforms.

PROJECTS

ML & IoT based smart vehicle Health Monitoring and predictive Maintenance System(Collage project) 12/2024– Present

- Final Year Engineering Project|Android, IoT, AI, Machine Learning|2025.
- I am currently working on the mobile app development of this project.
- I developed the ML models for this project(To predict the perfect day of appointment).
- Currently developing an Automatic appointment booking system that schedules service appointments based on real-time car health monitoring.
- I selected technologies to develop the project.

Smart Car Parking System(Collage project)

03/2024 – 9/2024

- I developed the front-end and the hardware part of this project.
- I developed the Architecture of this project, also created the block diagrams and the circuit diagrams.
- I did hardware selection for this project, also the connection of the hardware.

Tour booking system(Collage project)

06/2023 – 02/2024

- I developed the backend of this project using php.
- Also the hosting part is done by me.

ACHIEVEMENTS

- Achieved a 4-star rating in java on the HackerRank platform.([hackerrank profile](#))
- Achieved a Certificate of Java Multithreading Course on Infosys Springboard.([Springboard Certificate](#))
